

LED FLOODLIGHT SERIES

FEATURES

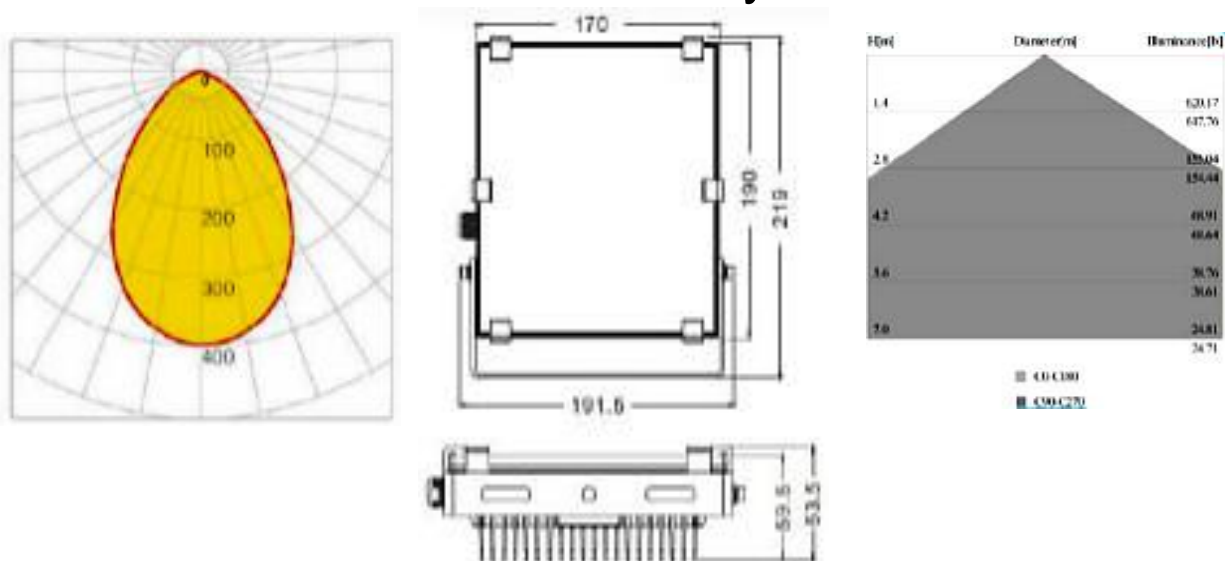

- **Title:** LFL Floodlight Series
- **Wattage:** 10, 20, 30, 80, 100, 150, 202
- **LED Lumens:** 100lm/W
- **Certificate:** CE, RoHS, EMC, LVD, SAA/UL Standard

LED Floodlights Series is the most cost-effective method for switching from older power-intensive, high-maintenance lighting to state-of-the-art LEDs that dramatically lower power and maintenance costs. The Floodlight Series works directly from the AC line without the need for conventional DC power supplies, improving reliability and reducing cost and weight. Existing boxes and wiring all remain in place with only the lighting source switched to LED with a custom reflector, heat sink and lens (as pictured above). Any element such as color, intensity or illumination pattern, can be modified with an optional custom design.

LED FLOODLIGHT SERIES

SPECIFICATIONS							
Model	LFL-10W	LFL-20W	LFL-30W	LFL-80W	LFL-100W	LFL-150W	LFL-200W
Power	10W	20W	30W	80W	100W	150W	200W
Output Lumen (100lm/W)	1000	2000	3000	8000	10000	15000	20000
Certificate	CE, EMC, LVD, SAA/UL						
Voltage	AC220-240V/AC100-120V						
277	Waterproof IP65						
LED Driver	No driver required						
Material	Die-cast aluminum and glass cover						
CCT	2700K~6000K						
Beam Angle	120°						
PF	>0.90						
CRI	RA≥80						
IP	65						
Working Temp.	-22~140°F (-30°C~60°C)						
Life Span	>50,000 Hrs
